

RESIDENTIAL ACCESSORY BUILDINGS

This guide has been prepared to provide information only and is neither a bylaw nor legal document. Should there be any discrepancy between this guide and the relevant City Bylaws and/or applicable Codes, the text of the Bylaws and Codes shall be the legal authority.

BACKGROUND:

The purpose of this guide is to assist the homeowner / builder or contractor with the Building Permit Application process to construct a detached residential accessory building. This guide will provide the public with information on the City of Langley's requirements for permits and inspections.

DEFINITION:

An accessory Building or Structure means: "a building or structure, the use of which is smaller, incidental and subordinate to that of a principal building or use situated on the same lot."

Detached buildings under 10 m² (107.64 ft²) do not require a building permit, however, must comply with the setback requirements set out in the City of Langley Zoning Bylaw for accessory buildings. All new construction and additions to existing buildings 10m² or larger require a building permit prior to commencing construction.

BUILDING PERMIT APPLICATION SUBMISSION

Building Permits are required when you wish to:

- ~ Construct a new accessory building, work shop or residential storage building;
- ~ Repair, renovate or add to an existing accessory building.

Applications are to include the following documentation:

- ~ A completed building permit application form;
- ~ A completed Form 1 – Owner's acknowledgement;
- ~ A title search (no older than 48 hours prior to the permit application);
- ~ Agent's Authorization form (if a building contractor is involved in the project);
- ~ Schedule B (is required when a Professional Engineer is involved in the project);
- ~ Form 2 – and copy of insurance (provided by the Professional Engineer as mentioned above);
- ~ 2 sets of building plans.

REQUIRED DRAWINGS:

The minimum size paper accepted will be 11"x17".
(Note: Lined or graph-paper will not be accepted, nor will plans drawn in pencil).

All plans submitted must be of an appropriate scale, with sufficient detail to establish compliance with the building code and City of Langley bylaws. The plans are to be legible and of suitable quality for digitization.

If you are unable to draw appropriate plans, then you must obtain the services of a qualified person.

For this type of permit, the necessary drawings and the minimum scale to be drawn in are as follows:

Site Plan: 1:100 or 1/8" = 1'0"
(The site plan is not a survey; however a survey may be used to create a site plan. A survey by a BC Land Surveyor may be required at the forms inspection to confirm the required setbacks to the property lines)

The site plan is to show:

- ~ Lot shape and size, with the setbacks (distances) from the building to the property lines;
- ~ North arrow;
- ~ Any easements, rights-of-way or water courses;
- ~ Driveway location, (existing or proposed);
- ~ Over-all building dimensions;

Foundation & Floor Plan: 1:50 or 1/4" = 1'0"

Elevation views: 1:50 or 1/4" = 1'0"

Cross section view: 1:50 or 1/4" = 1'0"

Truss layout: including point loads, sealed by the Professional Engineer.

It is the responsibility of the property owner to ensure the information complies with the current edition of the BC Building Code and City of Langley Bylaws.

Storm Drainage:

Rainwater down pipes may discharge to splash pads but not on to walking surfaces or driveway. Footing drainage must be connected to the City storm sewer system or where a connection is not available, an approved private storm drainage system (such as an infiltration gallery).

Driveway Addition/Relocation:

The addition or relocation of a driveway access may require Engineering Department approval.

Required Inspections:

- 1) **Forms Inspection:** on completion of the concrete form work but prior to placing concrete for the footings or foundation walls. (if a survey certificate was required to confirm the required setbacks to the property lines, it is to be on site for this inspection.)
- 2) **Drain Tile Inspection:** (required only when perimeter drainage is installed.)
- 3) **Framing Inspection:** to be called when all frame work, sheathing, and all electrical wiring has been

completed, but prior to the application of insulation or exterior cladding.

- 4) **Insulation Inspection:** required if thermal insulation and vapour barrier have been installed.
- 5) **Final Building Inspection:** when all construction is completed, including grading and before the building is occupied.
- 6) **Additional Information:**
 - 7) All contractors / trades people undertaking work in the City of Langley are to have a valid business licence with the City.
 - 8) **Note:** No excavation shoring, erection, alteration, enlargement, repair, removal or demolition of any building or structure or part thereof, shall be commenced or undertaken without a permit first being obtained from the City of Langley.

ZONING:

Setback Requirements

	FRONT	REAR	SIDE	EXTERIOR
RS-1	7.5m (24.61ft.)	1.5m (4.92ft.)	1.5m (4.92ft.)	4.5m (14.76ft.)
RS-2	7.5M (24.61ft.)	1.5m (4.92ft.)	3.0m (9.84ft.)	4.5m (14.76ft.)

Site Coverage:

The maximum permitted *lot coverage* for both RS-1 and RS-2 zoned properties is thirty-three percent (33%). **Lot Coverage** means the horizontal area covered by all buildings and enclosed structures and is expressed as a percentage of the *lot* area.

Location of Accessory Buildings:

In all Single-Family Residential Zones, an accessory building shall not be located closer to the front lot line than a principal building nor closer to a principal building than 1.0m (3' 4").

NOTE: Other than the following exceptions; *encroachment into a required setback, easement, right-of-way and/or restrictive covenant area is not permitted.*

Encroachment into required setbacks is permitted only for the following features:

eaves and gutters, cornices, sills, bay windows, sun shades, chimneys, steps or other similar features provided, such projections do not exceed 1.0m (3' 4") in depth.

- ~ **Easement(s), rights-of-way, restrictive covenant(s) areas:** Footings and overhangs are NOT permitted to encroach, unless otherwise noted in the Land Title Document registered with the Land Title Office.

Height Requirements:

Height is the vertical distance, measured from the "lowest" finished grade to the highest point on a flat roof, the average level between the eaves and ridge of a gable, hip, or gambrel roofed building or the deck line of a mansard roof. The maximum permitted height for an accessory building is **4.6m (15' 1")**

SOUTH LANGLEY INTEGRATED RAINWATER MANAGEMENT FOR UNSERVICED PROPERTIES

This guide has been prepared to provide information only and is neither a bylaw nor legal document. Should there be any discrepancy between this guide and the relevant City Bylaws and/or applicable Codes, the text of the Bylaws and Codes shall be the legal authority.

BACKGROUND:

The purpose of this guide is to provide basic information on the requirements for integrated rainwater management in South Langley on properties **NOT** serviced by City storm sewer. For detailed design information, please see **Section 5.0, Integrated Rainwater Management in the City of Langley Design Criteria Manual** of the new Subdivision and Development Servicing Bylaw 2020 No.3126.

Requirements:

Where a City drainage system is **NOT** available to a single-family dwelling lot in South Langley for which a building permit application for new construction, or an addition to a single family dwelling or accessory building an Integrated Rainwater Management plan will be required.

The requirement for an infiltration gallery is **exempt** if an additional roof area of 25m² (269sqft.) or less is proposed for a single family dwelling or if the **total** roof area of an accessory building is less than 25m² (269sqft.).

South Langley is located roughly south of Grade Crescent and 50 Ave between 196 Street and 210 Street. For the exact location and properties included in the South Langley area see the City of Langley Design Criteria Manual Dwg SS-SLO1

The following is a list of Integrated Rainwater Management requirements:

- Submission of a design for the Integrated Stormwater Management system by a Professional Geotechnical Engineer (to include a soils report, infiltration gallery design, downspout discharge, pervious pavement, lot grading and amended soils).
- The property must have existing soil conditions that are permeable or porous
- The infiltration gallery shall be located a minimum 5m away from the foundation of the nearest building and minimum 1m separation from the property line.
- A minimum **8.5m** front yard setback for the proposed construction will be required where the infiltration gallery is located in the front yard. The infiltration gallery will only be permitted in the rear yard when the property is on the north side of east-west streets in South Langley that are generally sloped north toward their backyard.
- Downspouts must discharge to splash pads.
- Impervious surfaces are not permitted.
- Amended soils must be placed on the property unless it can be shown by a Professional Geotechnical Engineer that the infiltration rate of the native soil is greater than 50mm/hour and as such amended soils are not required.
- Minimum building elevation of 0.30m above the crown of the road.

Requirement for Professional Geotechnical Engineer

The owner of the property is to obtain the services of a Professional Geotechnical Engineer, who is to provide:

- a report on the suitability of the soil and groundwater table depth of the subject property.
- provide an Integrated Rainwater Management and Lot Grading Plan. (Refer to Section 5.0 of the Design Criteria Manual for requirements).
- Schedule B and sealed design drawings
- Sealed copy of the on-site infiltration design template.

Covenant Requirements

Once the report and design drawings have been accepted by the City of Langley Engineering Department, a rough draft of the restrictive covenant and the engineer's report is to be submitted electronically to the City of Langley Building Department at inspections@langleycity.ca for review. The property owner will be notified if the draft document will require corrections or amendments. Once the draft restrictive covenant has been accepted, the owner is to provide 2 original signed documents, title search and letter of undertaking from the lawyer or notary to the City of Langley for final signatures. The report from the Geotechnical Engineer will be attached to a restrictive covenant that is to be registered against the property with the Land Title Office for the on-site infiltration gallery.

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Cross section of property complete with proposed building and elevations.
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Final infiltration rate in mm/hr for infiltration gallery design

Please note that it is the sole responsibility of the owner/agent to ensure that they have reviewed the project requirements and provided all applicable information on the integrated stormwater management plans. Additional information may be requested during the plan review process.

INTEGRATED RAINWATER MANAGEMENT FOR SERVICED PROPERTIES

This guide has been prepared to provide information only and is neither a bylaw nor legal document. Should there be any discrepancy between this guide and the relevant City Bylaws and/or applicable Codes, the text of the Bylaws and Codes shall be the legal authority.

BACKGROUND:

The purpose of this guide is to provide basic information on the requirements for integrated rainwater management in Langley on properties serviced by City storm sewer. For detailed design information, please see **Section 5.0, Integrated Rainwater Management in the City of Langley Design Criteria Manual** of the Subdivision and Development Servicing Bylaw 2020 No.3126.

Requirements:

Where a City drainage system is available to a single-family dwelling lot in Langley for which a building permit application for new construction, or an addition to a single family dwelling or accessory building an Integrated Rainwater Management plan will be required.

The requirement for a Rainwater Management is **exempt** if an additional roof area of 25m² (269sqft.) or less is proposed for a single family dwelling or if the **total** roof area of an accessory building is less than 25m² (269sqft.).

The following is a list of Integrated Rainwater Management requirements:

- Submission of a design for the Integrated Rainwater Management system by a Professional Geotechnical Engineer (to include a soils report, downspout discharge, pervious pavement, lot grading, sediment trap, storage manhole and amended soils).
- The property must have existing soil conditions that are permeable or porous
- Downspouts must discharge to splash pads.
- Impervious surfaces are not permitted.
- Amended soils must be placed on the property unless it can be shown by a Professional Geotechnical Engineer that the infiltration rate of the native soil is greater than 50mm/hour and as such amended soils are not required.
- The minimum building elevation (MBE) is to be 0.60m above the storm sewer service connection invert and 0.30m above the Major drainage System Hydraulic Grade Line (HGL), whichever governs.

Requirement for Professional Geotechnical Engineer

The owner of the property is to obtain the services of a Professional Geotechnical Engineer, who is to provide:

- a report on the suitability of the soil and groundwater table depth of the subject property.
- provide an Integrated Rainwater Management and Lot Grading Plan. (Refer to Section 5.0 of the Design Criteria Manual for requirements).
- Schedule B and sealed design drawings

Covenant Requirements

Once the report and design drawings have been accepted by the City of Langley Engineering Department, a rough draft of the restrictive covenant and the engineer's report is to be submitted electronically to the City of Langley Building Department at inspections@langleycity.ca for review. The property owner will be notified if the draft document will require corrections or amendments. Once the draft restrictive covenant has been accepted, the owner is to provide 2 original signed documents, title search and letter of undertaking from the lawyer or notary to the City of Langley for final signatures. The report from the Geotechnical Engineer will be attached to a restrictive covenant that is to be registered against the property with the Land Title Office for the Integrated Rainwater Management System.

I acknowledge that the owner of the land in respect of which this permit application is made is solely responsible for carrying out the work in accordance with the Building Code and other applicable laws respecting safety.

I acknowledge that the owner of the land is solely responsible for determining whether the work contravenes any covenant, easement, right of way, building scheme or other restriction affecting the building site, and whether the work requires the involvement of an architect under the Architect's Act or an engineer or geoscientist under the Engineers and Geoscientists Act.

I acknowledge that the City of Langley provides a limited monitoring service in relation to the building construction and does not, by accepting or reviewing plans, inspecting construction, monitoring the inspection of construction by others or issuing building or occupancy permits, make any representation or give any Assurance that the construction authorized by the permit for which application is made complies in every or any respect with the Building Code or any other applicable laws respecting safety.

If the City of Langley so indicates on any permit issued pursuant to this application, I acknowledge that the City has issued the permit in reliance on the certification of a registered professional, engaged by me to provide such a certification, that the plans for the work authorized by the permit comply with the Building Code and other applicable enactments, and that the fee for the permit has been accordingly reduced. I acknowledge that the City of Langley by issuing this permit or any occupancy permit, makes no representations to me or any other person as to any such compliance.
